

Mehmetcan Bozkuş

Junior Software Engineer

👤 Profile

Hello, I'm Mehmetcan. I've been actively working on projects in Java, Python, and C languages. I'm always focused on enhancing my skills in these domains and excited about delving into new programming languages, platforms, and fields. Looking forward to exploring more!

📁 Employment History

Long Term Intern at Turkcell, Remote

November 2023 — Present

During my part-time tenure with Turkcell on the Cloud Backup team, I spearheaded the development of an internal dashboard website using NextJS. This project aimed to enhance team efficiency by providing a **user-friendly interface for sorting, filtering, and interpreting incoming data**. My responsibilities included **integrating database functionality to retrieve the latest data, automating the retrieval process from Turkcell servers**, and ensuring seamless access to previous data records.

👥 Internships

Software Engineer Intern at Turkcell, Hibrit

August 2023 — October 2023

During my Turkcell internship with the Cloud Backup team, I focused on Python development for Veeam Backup & Replication REST API functionalities. **One of my key contributions was implementing an automated email system for specific customers in Turkcell Bulut**. This involved scripting, email template creation, and logging to enhance the customer experience.

★ Projects

Bank Automation System - Java/Swing

Spell Checker App - Java/Swing

Stock Control System - Java/Swing

Mail Automation System - HTML/CSS/Python

...

🎓 Education

Fatih Sultan Mehmet University, Istanbul

September 2021 — September 2025

Ecole 42, Istanbul

March 2023 — Present
